Pin Wheel
Spin when
it follows
the mouse
cursor
Move the pins
a couple pixels
down
Just one pixel
down and
make the pinwheels
thicker

400x400 px

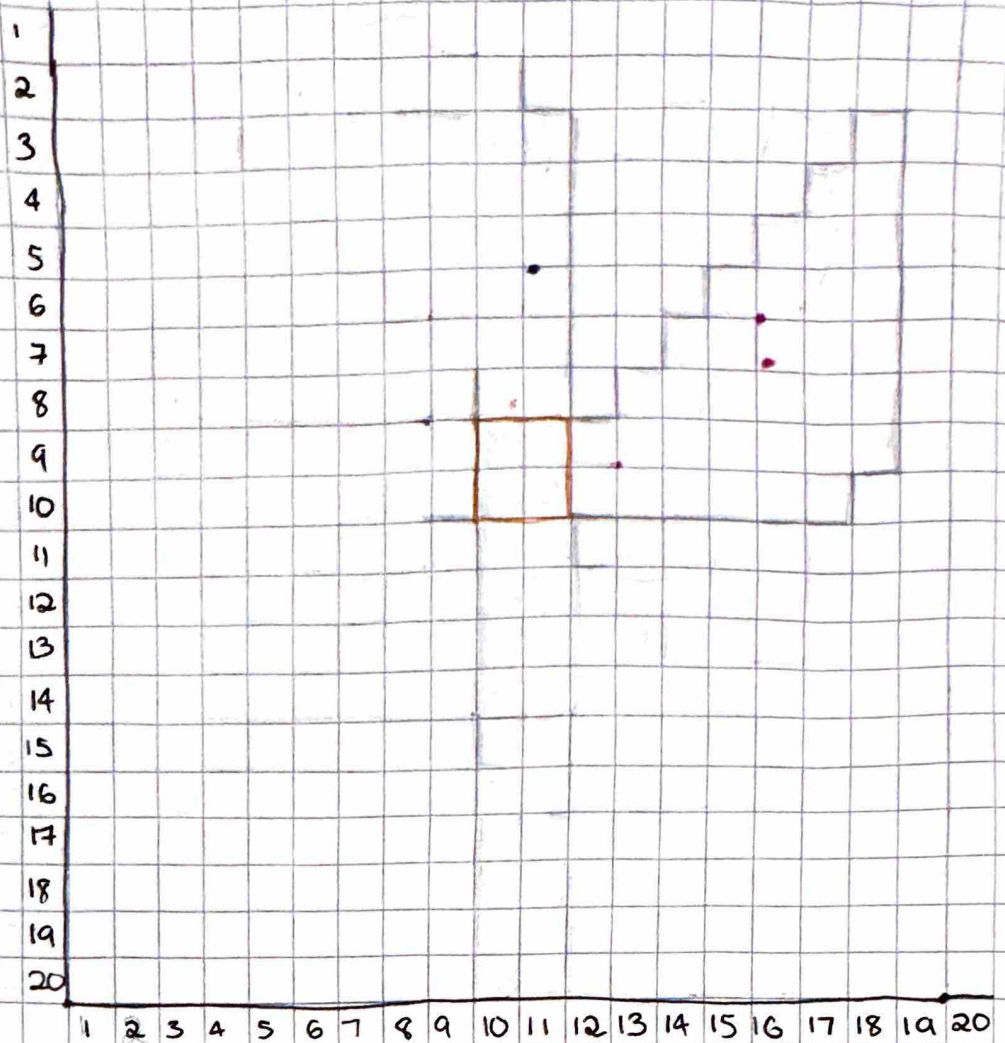

It may look a little
asymmetrical, but
all pins are the same
size

Hilroy

Coding for the Drawing

- Window.SetTitle - To name the Game
- Window.SetSize - Adjust size of the Game
- Window.TargetFPS=60;,, Render the Frames
- Window.Clear Background - repaint every frame

Put in Setup()

Put in UpDate()

Clear Bg → Colour Code → Azure
240, 255, 255

* Background Layers to be placed first into the code

• Foreground Layers are added last to the code

Correct Order for "Draw"

Draw.SetFillColor();
Draw.SetLineSize();
Draw.(Choice of shape/
Arc);

*No Colour to Line

OR Draw.SetFillColor();
Draw.SetLineColor();
Draw.SetLineSize();
Draw.(Choice of shape/Arc);

*IF adding colour to Line

Colours For Drawing

Bg-72,40,255 Azure (light blue) 35,206/235
Pinwheel 1- Shamrock Green (0,158,96)
Pinwheel 2- Golden Yellow (255,192,0)
Pinwheel 3- Vermillion (227,66,52)
Pinwheel 4- Orchid (218,112,214)
Stick- 128,160,109
Middle $\rightarrow$ Bright Orange (255,165,0)
(255,117,24 for outline)

Coordinates (x,y,w,h)

X $\rightarrow$ left $\rightarrow$ Right
Y $\rightarrow$ Top to bottom
W $\rightarrow$ Width
H $\rightarrow$ Height

Gonna change blades to
triangle, top advanced to
create original shape

Coords For Shape

Stick 180,220,20,200

Square 180,180,40,40

1 Triangle $\rightarrow$ 200,220,340,360,200,
360)

2 Triangle $\rightarrow$ 220,200,360,60,360,200

Ellipse (X,Y,W,H)

Capsule (X1,X2,X,Y,R)

~~Arc (x,y,w,h)~~

Arc (x,y,w,h, start angle sweep angle)

Arc (3 positions x₁,x₂,x₃)

Origin Point $\rightarrow$ 200,200

X

centre x,y

3

Hilroy

Maybe add more circles

Transparent BG
add another # For opacity
Bg

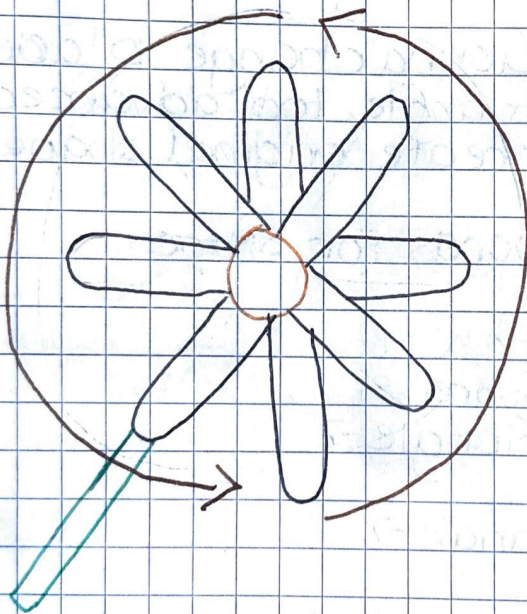

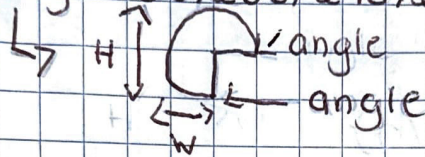

Transparent
add another at the end of the colour
code.

Arc centre, size, 2 vectors

Arc: centre point, width, Height, angle to,
angle from (0-360°)

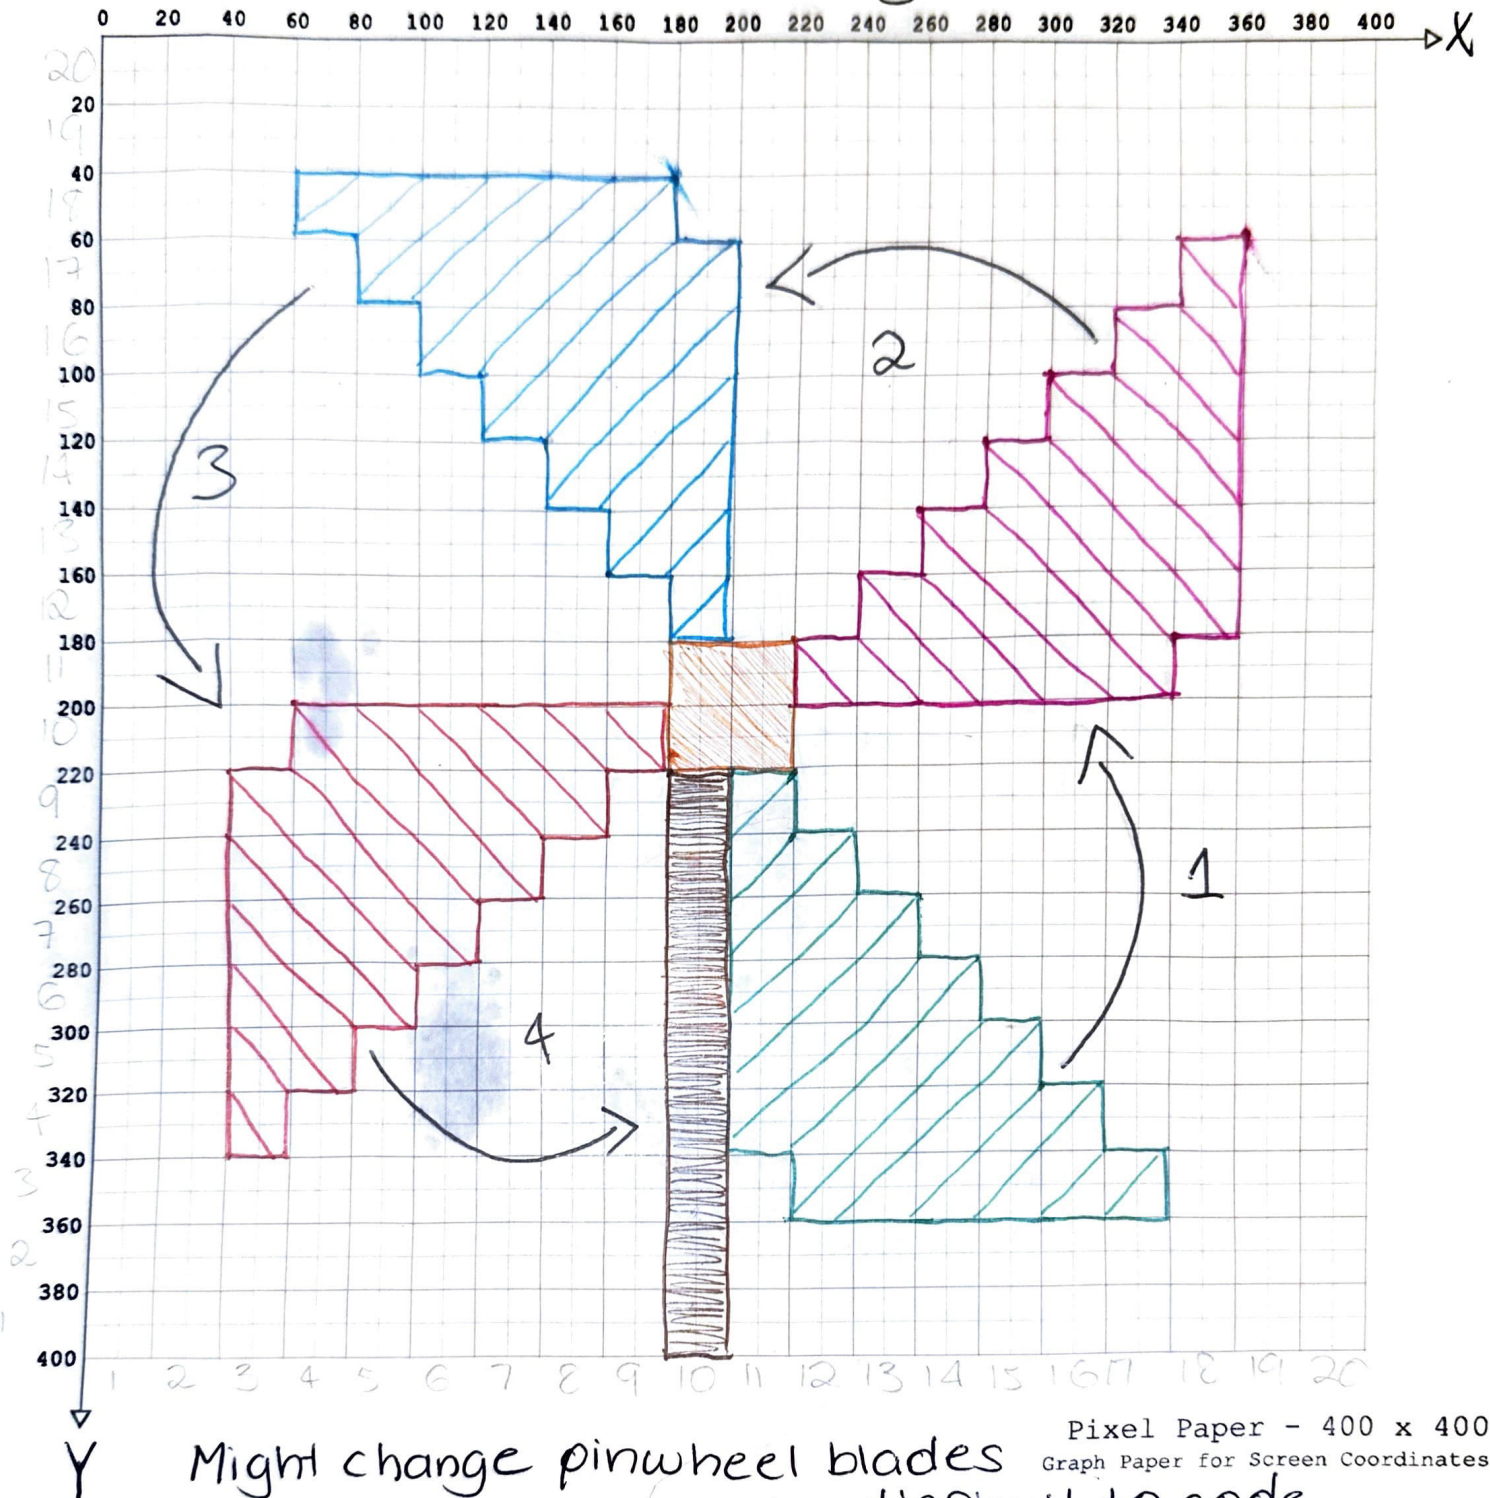

e.g 200, 200, 270, 270, 360, 90

Pinwheel Spinner

- The pinwheel will be following the cursor to make it spin. Spinning Counter-clockwise

• Colours below are meant to be fillers, will change the choice of colour when coding it

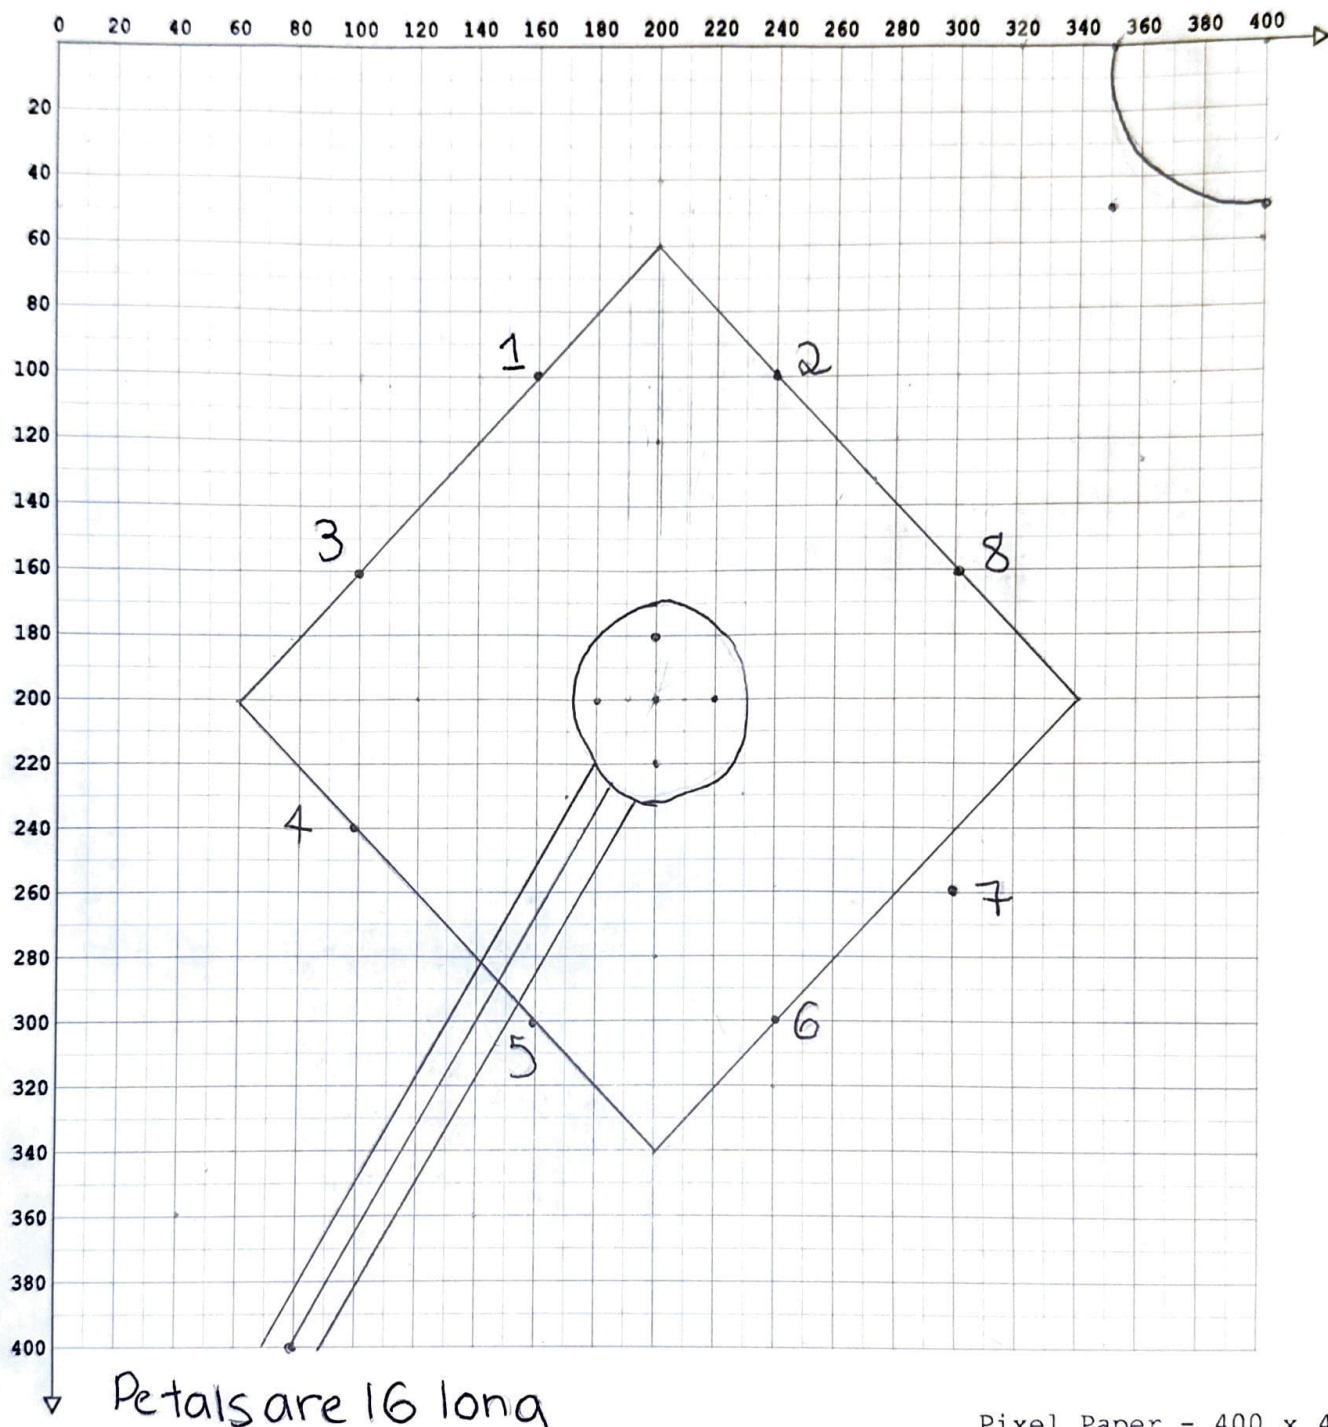

Might change pinwheel blades to triangle if shape is too difficult to code

Or another Shape

Proces Work 1

- Added a day & night mode for the design
- Might add shadows to give it more depth
- Tried adding shadows to give more depth, but couldn't execute it well with the capsule opacity on Visual Studio.

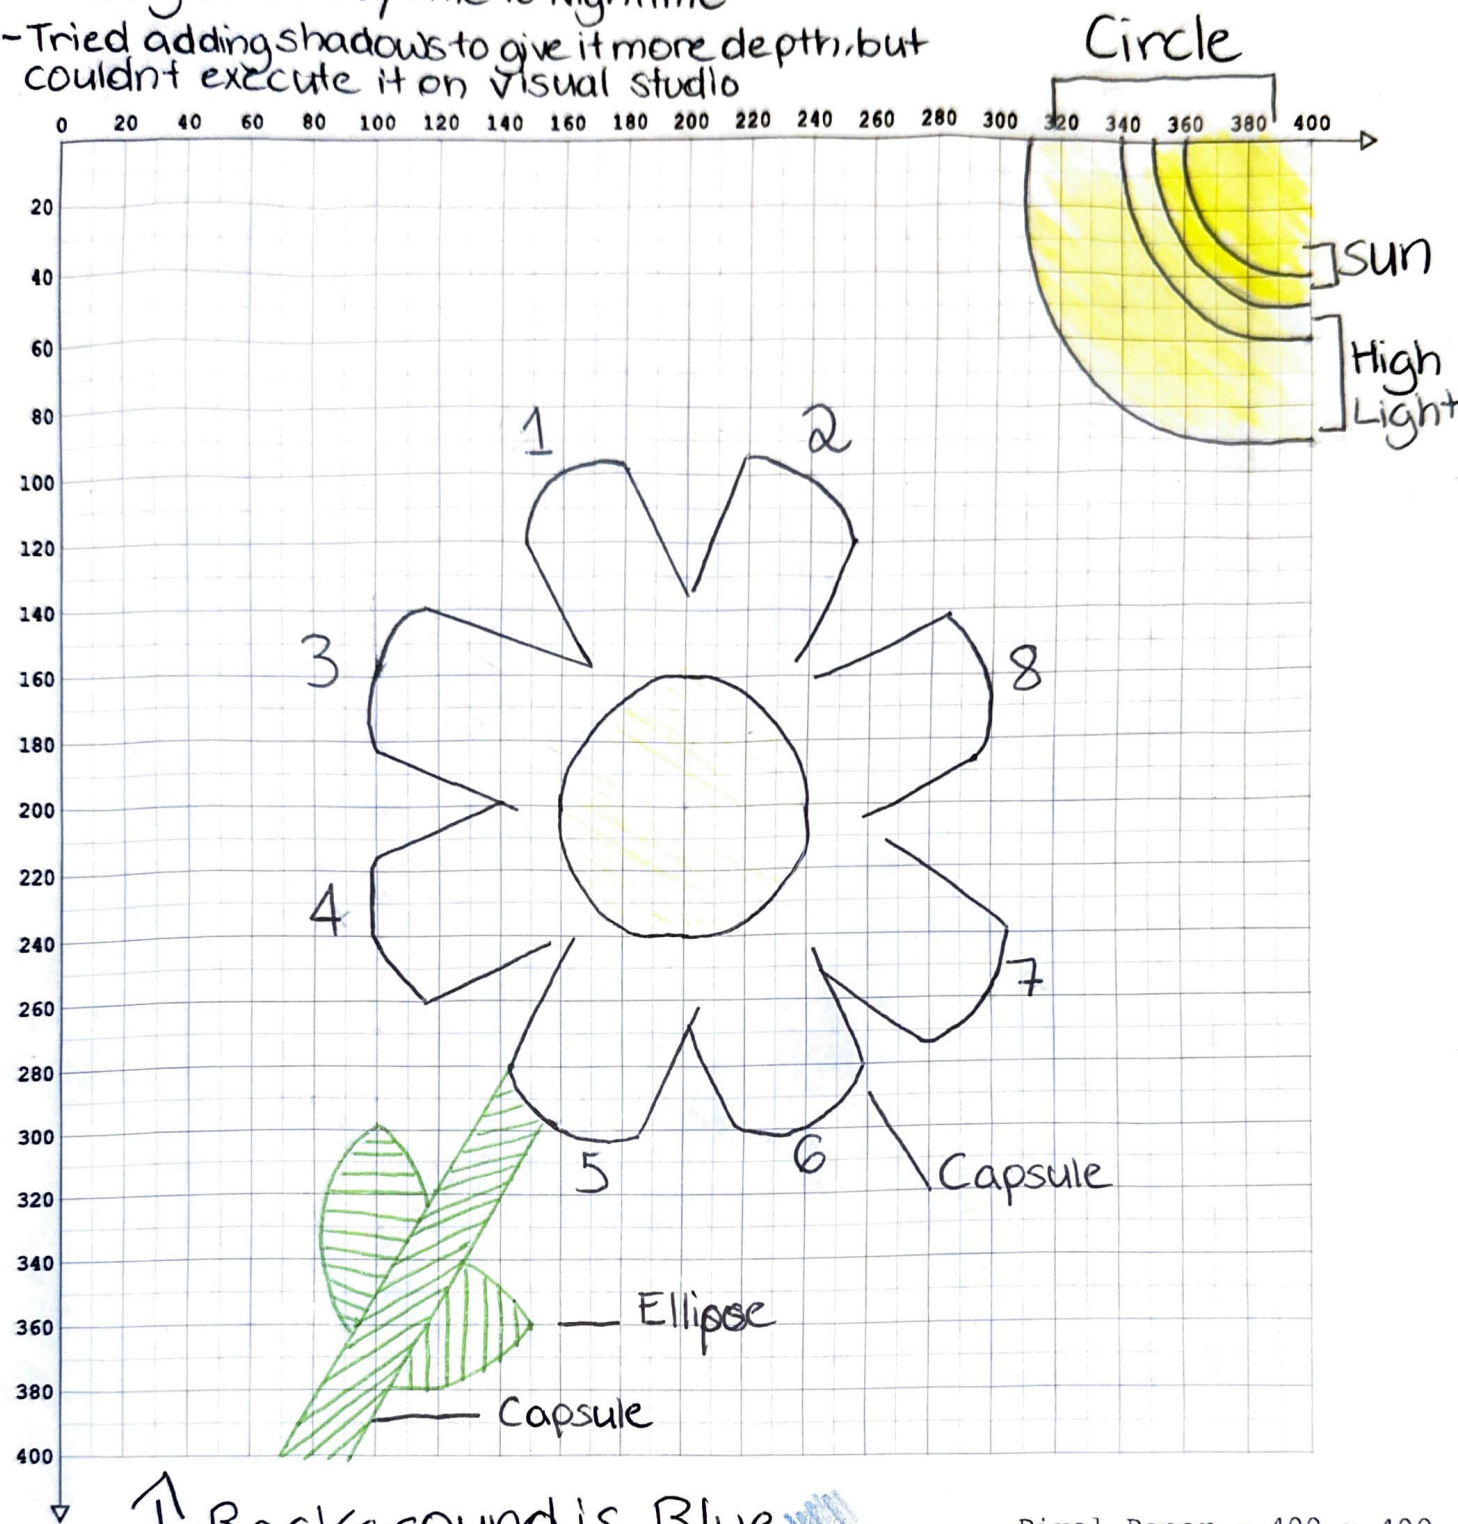

Pixel Paper - 400 x 400
Graph Paper for Screen Coordinates

Process Work
2

- Drawings Dimensions here will not be 100% accurate compared to on Visual Studio

- Pressing "Spacebar" will change the light setting of the drawing From Daytime to Nighttime

- Tried adding shadows to give it more depth, but couldn't execute it on Visual Studio

↑ Background is Blue

Pixel Paper - 400 x 400
Graph Paper for Screen Coordinates
